**STYLE 165LA**

- Temperature: To 550°F / 285°C
- pH Range: 0-14
- Speed: 4300 FPM
- Pressure: 300 PSI / 20 Bar
- Construction: Interlock Braid

**Description:** Graphite filled PTFE fiber with excellent thermal conductivity and chemical resistance. An economical substitute for 165.

**Equipment:** Valves, agitators, mixers, driers, refiners, rotating & reciprocating equipment, expansion joints

**Applications:** Corrosives, chemicals, solvents, water, steam, gases, air, ammonia, oils, liquor, paper stock, condensate. Marine shaft packing.

**Industries:** Agriculture, Chemical & Pharmaceutical, General industry, Marine, Municipal/Wastewater, Oil & Gas, Power generation, Pulp & Paper, Steel & Metals
