STYLE 165R

- Temperature: To 550°F / 285°C
- pH Range: 0-14
- Speed: 4300 FPM
- Pressure: 300 PSI / 20 Bar
- Construction: Interlock Braid

Description: Graphite filled PTFE fiber with reinforced corners to help prevent roll and extrusion. Excellent thermal conductivity and chemical resistance.

Equipment: Pumps, valves, agitators, mixers, driers and refiners

Applications: Bottom ash slurry pumps, tailings pumps, bauxite slurries, mineral handling slurries and other slurry processing
